What we do?

The shortest way to describe what we do is this: we provide Structural Engineering Services. That would tell you that we are part of the construction process but we specifically deal with the Design and Detailing of structures. Our team is well versed in market-leading software for Structural Design & Detailing Engineering. GLM provides services on the following sectors of engineering:-

DESIGN ENGINEERING

At GLM solution, we pride ourselves with our technical knowledge. Our services are more focused towards cost effective methods of design solutions. Our team has high capabilities in analysis (seismic, non-linear, fem) and Design of Steel & RC Structures.

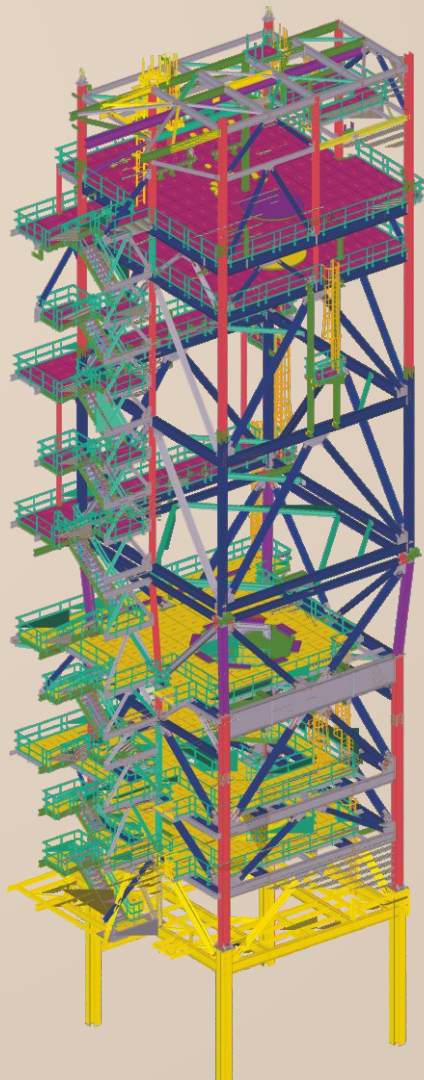

DETAILED ENGINEERING

We provide state of the art engineering in Structural Detailing by incorporating highly skilled professionals and market leading software. Structural Detailing, Drawings for fabrication & Erection, cnc, dxf, ifc export files as per client requirements are some of the services provided by our detailing department

BUILDING INFORMATION MODELING

Our professional team of engineers can create realistic design scenarios under Building Information Modeling (BIM). Clash detection and risk mitigation, 4d scheduling, 5d cost can be delivered by us in high precision and of superior quality estimation. Laser scan and point cloud models are also one among the latest bim technologies we research upon.

Why us?

Here at GLM Solution, we listen to what our clients want and find ways to deliver. In times where market demands are focused on sustainable and cost-effective solutions, we not only make sure to present results they want but also show output of the highest possible quality. Our in-house quality management system provides a better understanding and deliverance of documents for the clients. We communicate and collaborate in order to achieve desired results. Our employees are our strength. It's our achievement that every single individual at GLM is provided with an opportunity to improve and increase his technical acumen every day with the latest technologies and challenging concepts. It's a matter of fact that we aim towards the development of business and the quality of our working environment each day with a regularized workflow and management.
